ANKITA B BADDOLI

PYTHON DEVELOPER | AI/ML ENGINEER | BACKEND DEVELOPER

Karnataka, India | +91 9743222558 | ankitabaddoli4@gmail.com

LinkedIn: linkedin.com/in/ankita-baddoli-62816027a | GitHub: github.com/ankitabaddoli4

PROFESSIONAL SUMMARY

Artificial Intelligence and Machine Learning graduate (2026) with project experience in Python development, RAG-based AI applications, machine learning and REST API development. Familiar with Flask, FastAPI, React, JWT authentication, SQL and Git/GitHub. Seeking an entry-level role in Python development, AI/ML or backend engineering.

TECHNICAL SKILLS

- Languages: Python, SQL, Java (Basic)
- AI/ML: Machine Learning, Model Training and Evaluation, Feature Engineering, LSTM, TinyML, RAG
- Backend: Flask, FastAPI, REST APIs, CRUD, JWT Authentication, Role-Based Access Control
- Libraries: NumPy, Pandas, scikit-learn, TensorFlow, PyTorch
- Frontend and Tools: React, HTML, CSS, JavaScript, Git, GitHub, Postman, Unit Testing
- IoT: ESP32, Arduino, MPU6050, GPS/GSM, Sensor Data Processing

KEY STRENGTHS

- Python and AI Application Development
- RAG-Based AI Solutions
- REST API Development
- Machine Learning Fundamentals
- Problem-Solving and Teamwork

PROJECTS

CareerNexus AI - AI-Powered Resume and Career Assistant | GitHub: github.com/ankitabaddoli4/CareerNexus-AI

- Developed resume analysis, job-description matching, skill coverage analysis and RAG-based career question answering.

AI-Powered System Monitoring Dashboard | GitHub: github.com/ankitabaddoli4/AI-System-Monitoring-Dashboard

- Developed system monitoring and REST API features, with work on ML-based CPU usage prediction.

Full-Stack Task Management App | GitHub: github.com/ankitabaddoli4/Full-Stack-Task-Management-App-FastAPI-React-

- Built a React frontend and FastAPI backend with CRUD operations and JWT authentication.

Task Management REST API | GitHub: github.com/ankitabaddoli4/Week9-TASK-MANAGEMENT-REST-API

- Created Flask REST endpoints with authentication, role-based access control and unit testing.

Live System Monitoring Dashboard | GitHub: github.com/ankitabaddoli4/week11-production-deployment

- Developed a system monitoring dashboard using a modular Flask backend with Flask Blueprints.

Two-Wheeler Accident Prediction and Mitigation System - Academic Capstone

- Explored LSTM and TinyML concepts for sensor-based accident prediction and a proposed ESP32/GPS/GSM alert workflow.

INTERNSHIP EXPERIENCE

Python Developer Intern - The Developers Arena | Remote | February 2026 - May 2026

- Worked on Python development tasks, backend concepts and REST API functionality using Git/GitHub.

EDUCATION

B.E. in Artificial Intelligence and Machine Learning
Sharnbasva University, Kalaburagi | 2026 | CGPA: 8.87/10

CERTIFICATIONS

- Python Developer Internship Certificate - The Developers Arena
- Artificial Intelligence - Infosys Springboard | TCS iON Career Edge - Young Professional | Data Analysis with Python - Cognitive Class

ACHIEVEMENTS

- Secured ₹5,000 in project sponsorship as part of a team for the Two-Wheeler Accident Prediction and Mitigation System by presenting its concept and technical feasibility to external sponsors.
