

ANKITA B BADDOLI

Aspiring AI/ML Engineer

Karnataka, India | +91 9743222558 | ankitabaddoli4@gmail.com

LinkedIn: www.linkedin.com/in/ankita-baddoli-62816027a

GitHub: <https://github.com/ankitabaddoli4>

CAREER OBJECTIVE

Aspiring AI/ML Engineer with hands-on experience building end-to-end intelligent systems spanning embedded sensing, machine learning, and full-stack web development. Skilled in Python, TensorFlow/PyTorch, and Flask/FastAPI, with a track record of shipping real-time monitoring dashboards and a sponsored AI-enabled safety device. Seeking an entry-level AI/ML Engineer role to design and deploy intelligent, real-world solutions.

TECHNICAL SKILLS

Languages: Python, Java (Basic)

AI/ML: Supervised & Unsupervised Learning, Model Training & Evaluation, Feature Engineering, TinyML, LSTM Neural Networks

Libraries & Frameworks: NumPy, Pandas, Scikit-learn, TensorFlow, PyTorch

Web Development: Flask, FastAPI, HTML, CSS, REST APIs

Embedded / IoT: ESP32, Arduino, MPU6050 (Accelerometer/Gyroscope), GPS, GSM, Sensor Fusion

Tools: Git, GitHub, VS Code, Postman

Concepts: Data Structures & Algorithms, OOP, REST API Design

PROJECTS

Accident Prediction & Mitigation System for Two-Wheelers Using AI-Enabled Portable Airbag Deployment / 8th Sem Capstone Project / TinyML, LSTM, ESP32, IoT

- Designed an AI-enabled, real-time collision-prediction system for two-wheelers using an LSTM-based TinyML model deployed on ESP32, targeting 95%+ prediction accuracy with minimal false positives
- Engineered a sensor-fusion pipeline (MPU6050 accelerometer/gyroscope + speed sensor) to detect abnormal acceleration, tilt, and impact patterns, triggering automated portable airbag deployment within a sub-50ms critical response window
- Integrated GPS + GSM modules to auto-transmit live location and SOS alerts to emergency contacts, and built a Wi-Fi safety dashboard for real-time visualization of speed, G-force, tilt, and crash status
- Secured ₹5,000 in project sponsorship by pitching the concept and technical feasibility to external sponsors

AI-Powered System Monitoring Dashboard / Flask / Machine Learning / JavaScript

- Built a real-time CPU, memory, and disk monitoring system with REST APIs for live metric collection
- Developed an ML model for CPU usage prediction with automated alert notifications

GitHub: <https://github.com/ankitabaddoli4/AI-System-Monitoring-Dashboard>

Live System Monitoring Dashboard / Flask / DevOps / JavaScript

- Developed a real-time monitoring dashboard with live system resource tracking
- Designed a scalable backend architecture using Flask Blueprints

GitHub: <https://github.com/ankitabaddoli4/week11-production-deployment>

Full-Stack Task Management App / FastAPI / React

- Built a full-stack task management application with JWT-based authentication
- Implemented CRUD operations and integrated the React frontend with the FastAPI backend

GitHub: <https://github.com/ankitabaddoli4/Full-Stack-Task-Management-App-FastAPI-React->

Task Management REST API / Flask

- Developed a secure REST API with authentication and role-based access
- Designed scalable endpoints and implemented unit testing for reliability

GitHub: <https://github.com/ankitabaddoli4/Week9-TASK-MANAGEMENT-REST-API>

ACHIEVEMENTS

- Secured ₹5,000 in sponsorship for the AI-Enabled Portable Airbag Deployment capstone project by presenting the concept and technical feasibility to external sponsors
- Built and shipped 4+ independent AI/ML and full-stack projects, each with public GitHub repositories

INTERNSHIP EXPERIENCE

Python Developer Intern — The Developers Arena

Feb 2026 – May 2026

- Developed REST APIs and full-stack applications using Python and Flask
- Built backend services and integrated databases for production use
- Created dashboards for data visualization of application metrics
- Used Git/GitHub for version control and collaborative development
- Improved code quality through peer code reviews and adherence to best practices

EDUCATION

Bachelor of Engineering in Artificial Intelligence & Machine Learning

Sharnbasva University, Kalaburagi | 2026

CERTIFICATIONS

- Artificial Intelligence — Infosys Springboard
- TCS iON Career Edge — Young Professional
- Data Analysis with Python — Cognitive Class
